

TRANSLATING WHOLE LIFE LEARNING INTO SKILLS

TerritoriumCLR creates an ecosystem around a Comprehensive Learner Record that captures all aspects of learning into a complete competencies and skills transcript

[WATCH VIDEO](#)

BETTER LEARNING AND CAREER OUTCOMES

By harnessing AI, TerritoriumCLR is able to rapidly map and analyze every on-campus and off-campus learning experience into the granular competencies and skills that reflect true learning – not just grades and badges. This enables TerritoriumCLR to recommend courses, learning experiences, and job pathways tailored to a student’s interests and needs, empowering them with personalized competencies, skills and evidence information to position them for a more successful academic and professional career.

Accurately Maps Every Learning Experience.

Integrates with Leading Education and Career Systems.

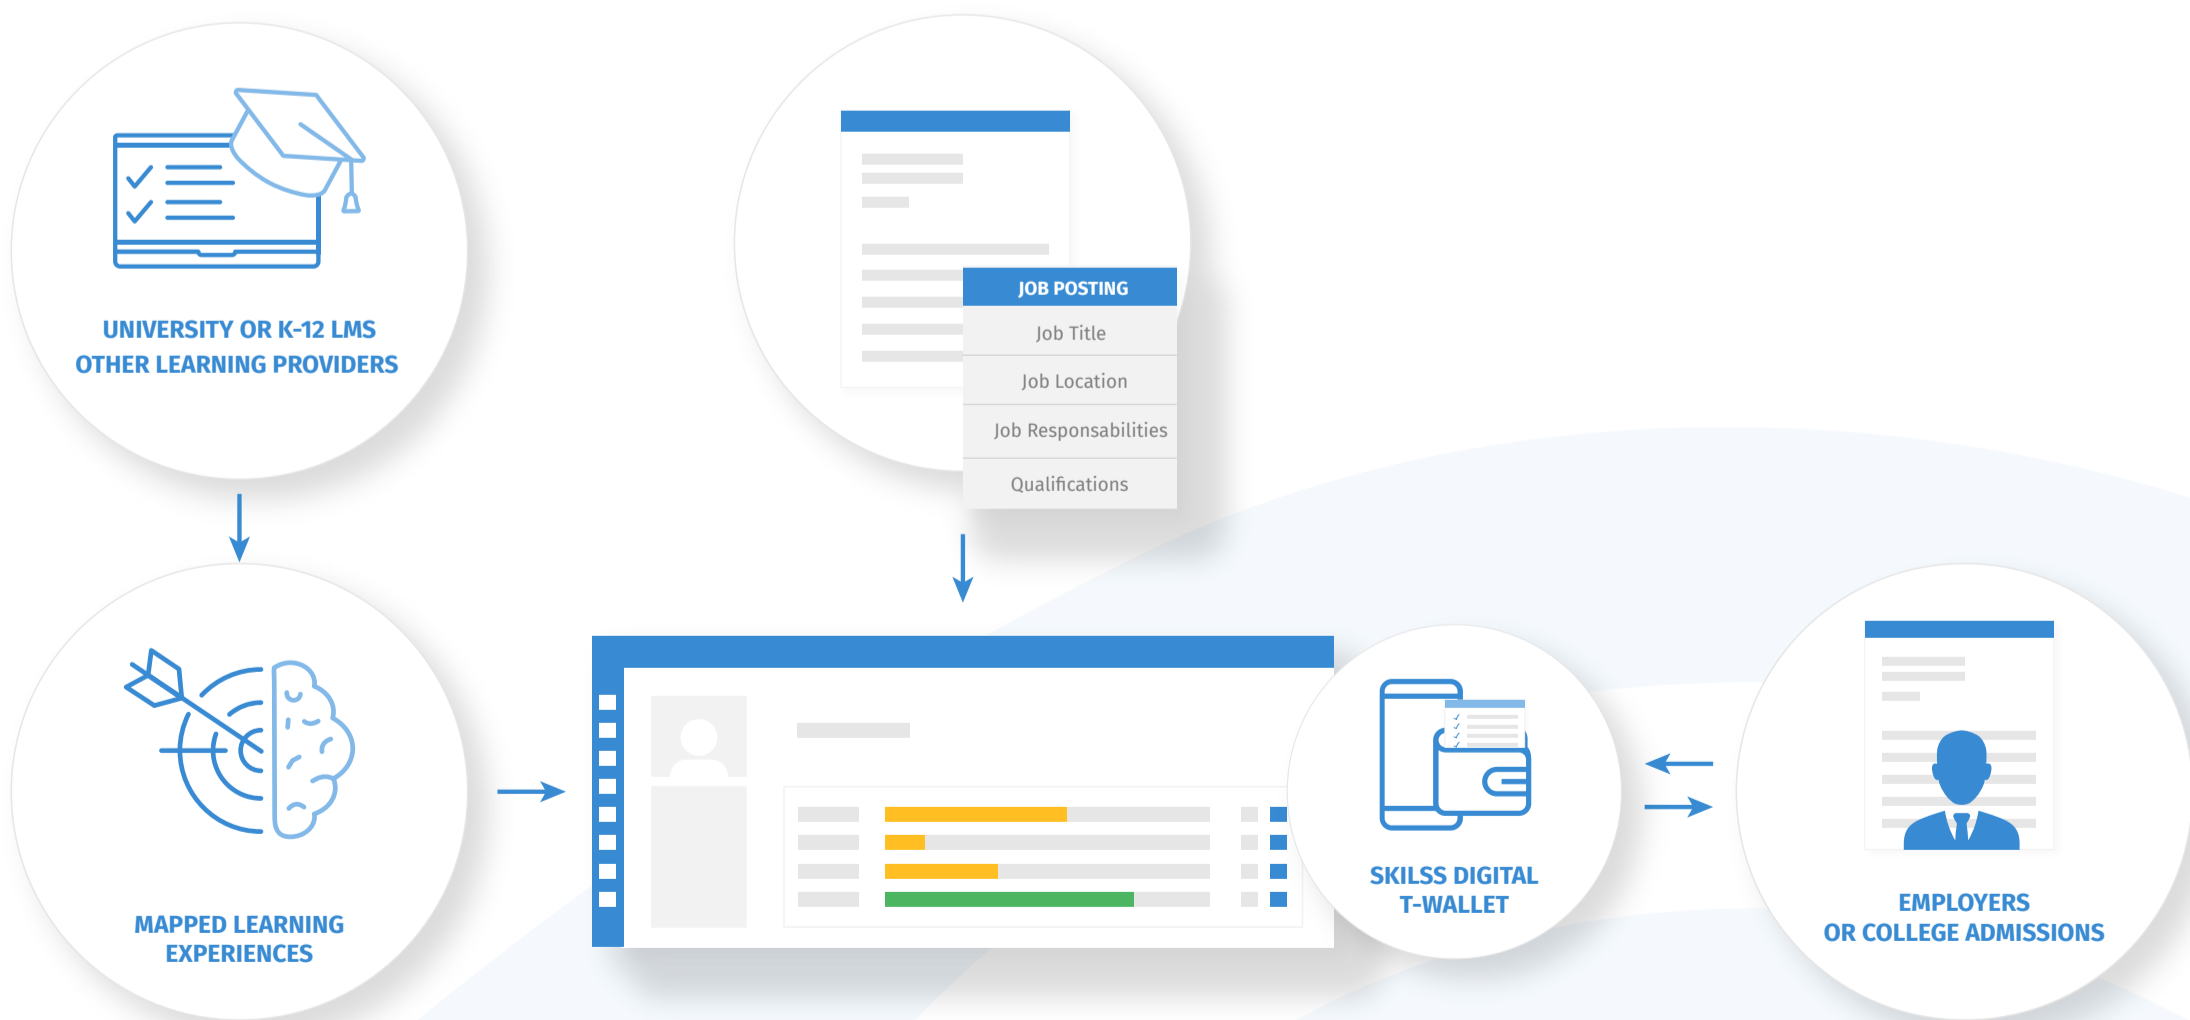

Leverages Advanced Machine Learning Features.

LIFELONG LEARNING HAPPENS EVERYWHERE™

TerritoriumCLR delivers all aspects of learning in a lifelong record of achievement to help the individual optimize their education and career, while also giving schools, universities, governments, and companies a new way to improve their organizational performance.

HOW THE TERRITORIUMCLR WORKS

TerritoriumCLR seamlessly and easily integrates with leading campus learning management systems such as Canvas, Blackboard, Brightspace, and Moodle, as well as Territorium’s own LMS that’s called LXP. It also offers connections to LinkedIn, Indeed, and other top-rated job boards to surface relevant job opportunities based on acquired competencies and skills.
